

PREVENTATIVE CARPET CARE: LOW MOISTURE FOAM CLEANING

*Enjoy a deeper clean
with a positive impact
on the environment.*

SUPERIOR CLEAN

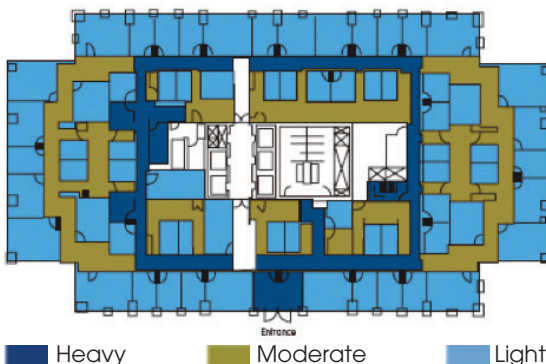

At Lippert Flooring and Tile, we use preventative low-moisture maintenance to clean your carpets. With our foam cart application, we offer a targeted option that provides a deeper clean than traditional restorative processes.

INCREASED LONGEVITY

Restorative cleaning methods can wear your carpets down. With our low moisture foam application, we help you increase the longevity of your carpeting. Our methods protect carpet fibers, lift carpet fiber rather than compress, and use minimal water — reducing the damage often caused by traditional carpet cleaning methods.

PREVENTATIVE MAINTENANCE

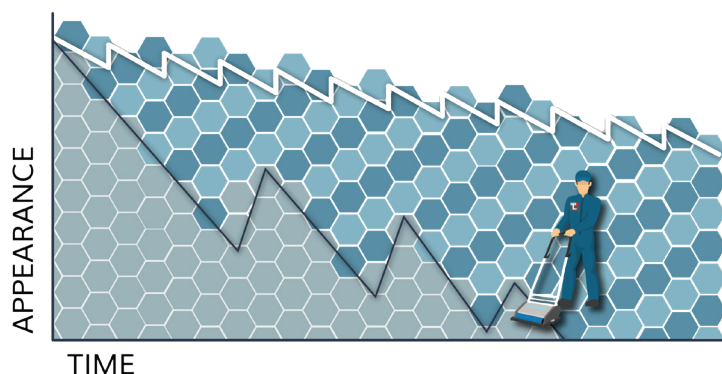

We develop a customized preventative maintenance plan that fits your workplace. With targeted treatment of high-traffic areas in your building, we eliminate the need for frequent, damaging restorative processes that can

FLOOR APPEARANCE & DURABILITY OVER TIME

— PROACTIVE Maintenance — REACTIVE Maintenance

At Lippert, we're committed to putting you first. We work with you to develop a maintenance plan that saves your carpet — and wallet — from unnecessary damage.

REGULAR PREVENTATIVE MAINTENANCE WITH A POSITIVE IMPACT ON THE ENVIRONMENT

INNOVATIVE. PROACTIVE. ECO-FRIENDLY.

Discover the benefits of our foam carpet cleaning capabilities. With thoughtful design and simplified execution, this process keeps your carpets looking clean and vibrant. Using significantly less water than traditional extraction and taking as little as fifteen minutes to dry, this method is an eco-friendly and wallet-friendly option.

Conventional carpet cleaning uses water extraction to remove soil. Our foam cleanser reacts to dirt and binding agents in the carpet, emulsifying and crystallizing into a powder that is easily removed through standard vacuuming.

ENVIRONMENTALLY-MINDED CLEANING SOLUTIONS THAT KEEP UP WITH YOU

A preventative maintenance plan targets the high-traffic areas in your office on a regular basis. With typical restorative methods like water extraction, cleaning carpets can take extensive time that your business doesn't have to spare. Our low moisture foam application offers a faster (and more environmentally-conscious) solution that can be used on targeted spaces in your workplace — which means you can prioritize common areas.

With foam cleaning, you don't have to worry about the damage or hassle of traditional carpet cleaning. Experience the superior method that keeps your workplace polished and clean.

- Removes 2X more debris than typical spray methods
- Enhances the look and vibrancy of the carpet
- Lifts carpet fiber rather than compresses it
- Reduces amount of restorative extraction needed
- Stays cleaner longer and extends the life of the carpet
- Cost-effective & eco-friendly
- Seal of approval from the Carpet and Rug Institute (CRI)
