# FLOOR CARE AND FACILITY SANITIZATION

*Disinfecting floors  
and high contact  
surfaces for health  
and safety*

## CARPET AND FURNITURE

Our team of floor care experts provides a variety of surface cleaning treatments for both carpet and furniture. From initial restoration cleaning to ongoing sanitation, Lippert Flooring & Tile offers preventative maintenance options for all budgets.

## HARD SURFACES

When it comes to long-term maintenance, Lippert Flooring & Tile is here to keep your flooring looking brand new! From post-installation cleaning and dry buffing, to floor finish application, our team is equipped to preserve and beautify hard surface flooring.

## TILE AND GROUT

Floor Care Technicians provide specialty service and support for a variety of tile surfaces. All methods are approved by IICRC, CRI, and the material manufacturer. With flexible scheduling to meet your monthly, bi-monthly, or quarterly needs, our Floor Care team has a facilities management background that flexes to the needs of your business.

*"Here at Lippert Flooring and Tile, We work hard every day to maintain the wealth of knowledge and skills needed to perfect our craft."*

## PROVIDING PEACE OF MIND WITH COMPREHENSIVE FACILITY SANITIZATION SOLUTIONS

### SAFE. CLEAN. SANITIZED.

Simply put, clean surfaces result in a healthier workplace. While regular floor maintenance reduces dust and allergens in the workplace, our selection of enhanced disinfecting solutions provide the safest possible results in your facility.

We invite you to learn more about our EPA registered disinfectant chemistry and its residual disinfection effect. Regular reapplication ensures the safest possible results, especially in high traffic areas. Our service technicians will design a disinfection solution custom-tailored to meet your unique needs.

### ENHANCED DISINFECTING SOLUTIONS FOR MULTIPLE APPLICATIONS

Different methods of chemical application are required to effectively sanitize different surfaces. Touch point disinfecting focuses on areas or items that are touched frequently by multiple people. Such as light switches, doorknobs, handrails, elevators, and drawer handles. Anti-microbial coatings work 24/7 to kill bacteria, minimizing the potential for staining and unpleasant odors. These coatings provide an increased life-cycle, providing a significant cost-benefit.

Electrostatic fogging applies safe chemicals to improve infectious disease control. Our process reduces the time it takes to cover and disinfect surfaces while killing noroviruses and rotaviruses on contact.

- Kills 99.9% of bacteria in 5 seconds
- 44 organism claims
- Kills cold, flu, and MRSA viruses
- One-step disinfecting
- Eliminates odors
- Sanitizes soft surfaces
- Inhibits the growth of mold and mildew
